PROBLEM STATEMENT

The absence of a centralized platform providing a comprehensive view of universities' amenities, resources, and opportunities makes it challenging for students to assess and compare colleges based on their preferences and requirements. As a result, students may end up in institutions that don't align with their aspirations, leading to negative impacts on their academic performance and career prospects. The creation of MyCampus website aims to bridge this information gap and empower students in their college selection process. Through this website, students will have the opportunity to make informed choices and embark on a transformative educational journey that aligns with their interests and aspirations.

OBJECTIVES

Provide a centralized platform that offers comprehensive and reliable information about various colleges in India.

Facilitate informed decision-making by enabling students to access the detailed information about academic programs, research opportunities and campus facilities.

Promote holistic development by highlighting colleges' offerings related to holistic development, such as extracurricular activities, student clubs that enables students to choose institutions that foster their overall growth.

WEBSITE'S FEATURES

Aesthetically Pleasing Design

The website will have a visually appealing design that engages users and motivates them to explore the content. It will incorporate modern design principles, attractive graphics, and an intuitive user interface to enhance the overall user experience.

HOME

The home page of the website provides a quick virtual tour of the campus. The page displays unique features of the campus, college facilities and the reviews of the students

ABOUT

The about page displays a detailed information about the campus and as well as the social media handles which enables the user to know about the achievements of the college students in the real time

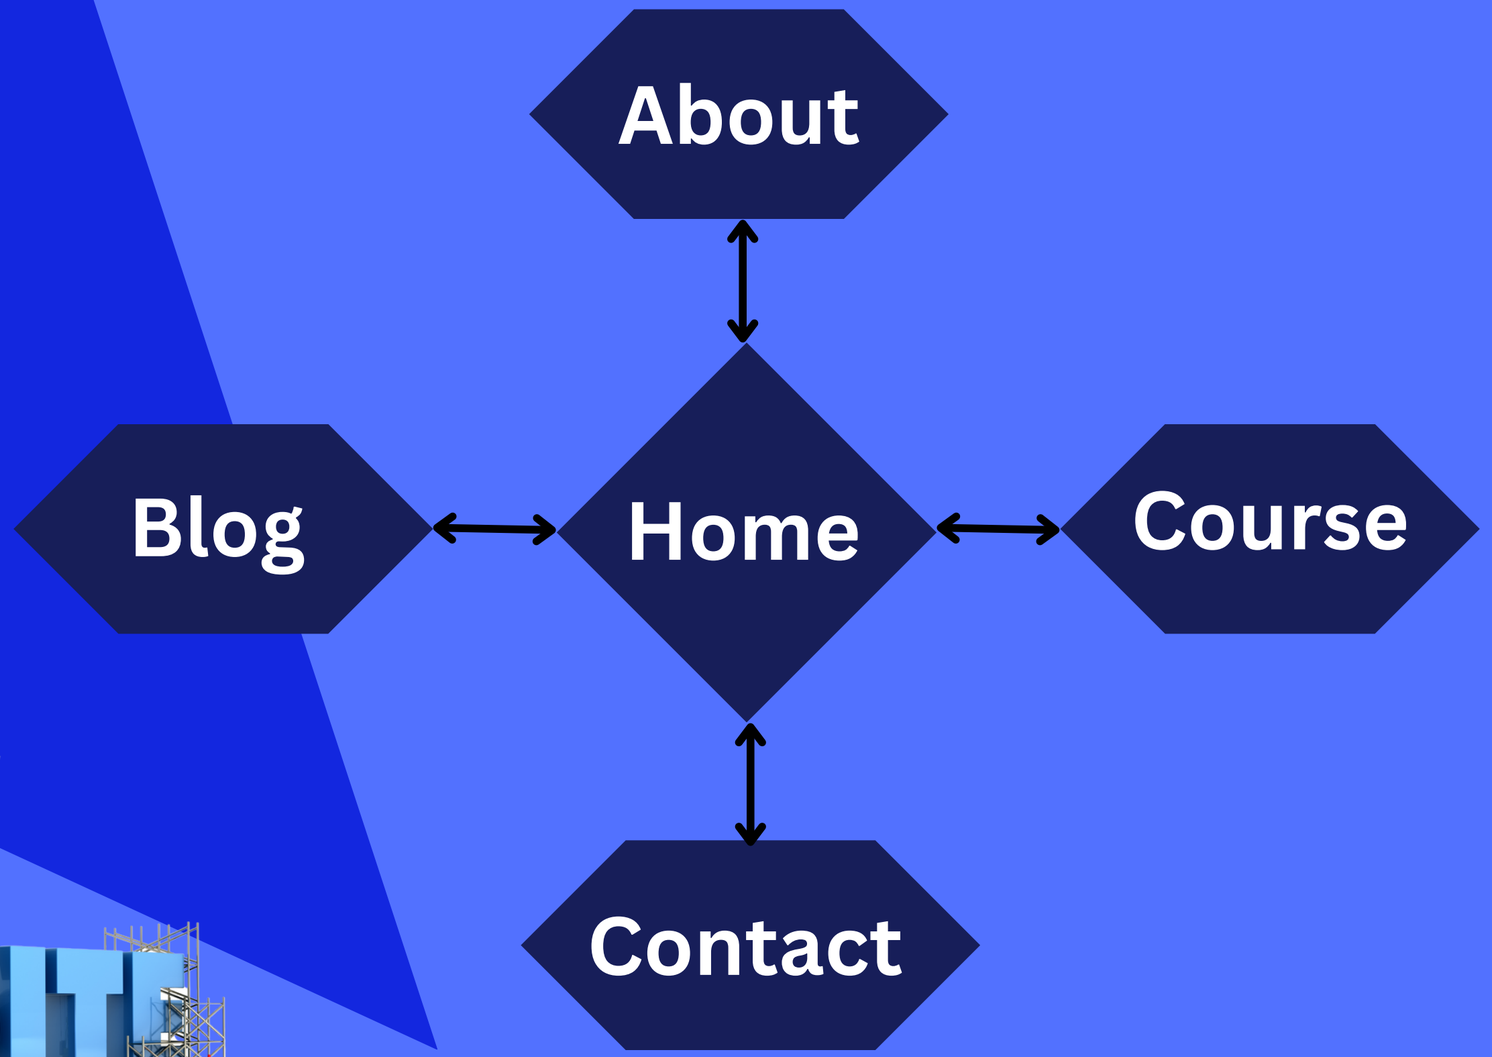
COURSE

The course page provides information regarding various degree courses the college offers along with the intake capacity in each course

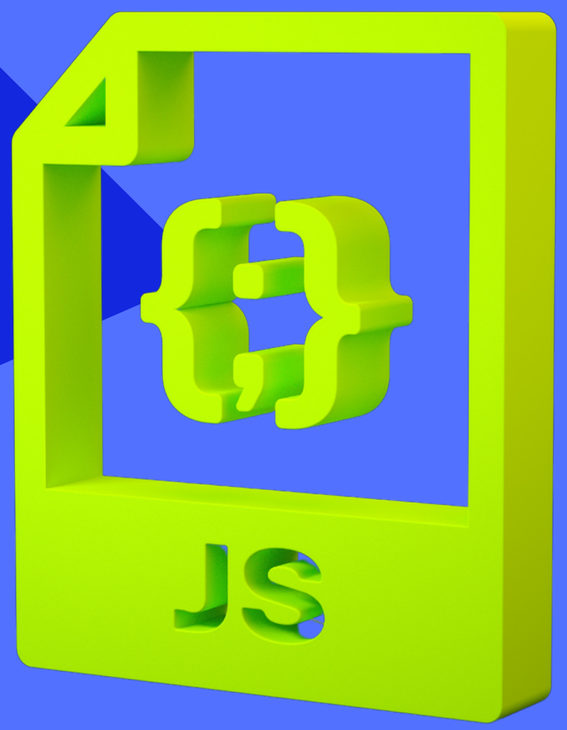
WEBSITE'S FEATURES

BLOG	CONTACT US
The blog page informs the user about the online courses and the certificates that the college has to offer	The contact us page displays the exact location of the college on google maps, phone numbers and college's email id. The user can also use the message form that we have created to convey their grievances

SITE STRUCTURE



TECH STACK



FUTURE PLANS

Committee	R & D	Centralized
This page will enlist user with all the clubs and committees a college has, which increases transparency about the holistic development opportunities a college has to offer	Do research and collect detailed information about colleges and incorporate the details in the website	We are planning to make MyCampus a one stop destination wherein the user can list their requirements and our website would display a filtered list of various colleges according to the user's requirements.

OUR VISSION

We are planning to make MyCampus a one stop destination wherein the user can list their requirements and our website would display a filtered list of colleges according to user's requirements.

To make choosing colleges easy and efficient

Thank You
